Objective:

To secure a junior front-end software engineer position in a dynamic and fast-paced company that will allow me to utilize my skills and gain valuable experience in the field of web development.

Education:

Computer Software Engineering
Codecademy, Sololearn

Skills:

- Proficient in HTML, CSS, JavaScript, and jQuery
- Experience with React, Angular, and Vue.js
- Familiarity with Node.js and Express.js
- Strong understanding of web design principles and best practices
- Excellent problem-solving and debugging skills
- Familiarity with agile development methodologies
- Experience with Git and GitHub
- Strong communication and collaboration skills

Projects:

Portfolio

Demonstrate proficiency in HTML, CSS, and JavaScript, as well as frameworks and libraries like React, Bootstrap, and jQuery. It features a simple but elegant website that is responsive and includes smooth scrolling and animation effects.

Youtube Clone

Shows my ability to build a web application that replicates some of the functionality of the popular video sharing platform. It showcases proficiency in HTML, CSS, and JavaScript, as well as frameworks like React and Bootstrap, and incorporates features like video playback, search, and user authentication.
